

## ❖Right Angled Triangle:

Explanation: -

The problem is to print a right triangle of asterisks based on a given number of rows  $n$ . Each row  $i$  should contain  $i$  asterisks, starting from 1 asterisk in the first row to  $n$  asterisks in the  $n$ -th row. The solution should be implemented using a recursive approach.

Time Complexity: -  $O(n^2)$

Space Complexity: -  $O(n)$
